I am Lakshya, a Data Engineering student building AI-powered software using modern full-stack technologies. I enjoy developing intelligent applications, AI coding tools, and machine learning systems that solve real-world problems.

Education

Bachelor of Engineering, Artificial Intelligence (Data Engineering)

Satakunta University of Applied Sciences (SAMK), Finland

Expected Graduation: 2027

Featured Projects

EasyCode ([GitHub](#))

TypeScript, Bun, OpenTUI, Hono, PostgreSQL, AI SDK

- Developing a terminal-based AI coding assistant inspired by Claude Code and Open Code.
- Built a modular monorepo architecture with custom packages and streaming AI chat.
- Integrated local file editing, shell execution, and developer tooling.

Telemetry Driver Performance Analysis (Bachelor's Thesis)

Python, Pandas, NumPy, Machine Learning

- Developed an end-to-end telemetry analysis pipeline for Assetto Corsa.
- Implemented lap detection, feature engineering, racing-line comparison and automated driver feedback.
- Generated analytical reports and visualizations for driver performance.

Technical Skills

Programming: Python, C++, C#, JavaScript, SQL

AI/ML: PyTorch, TensorFlow, NumPy, Pandas, Scikit-learn, AI SDK

AI Development Tools: Claude Code, OpenCode, GitHub Copilot, ChatGPT

Databases: PostgreSQL, MongoDB, Prisma

Tools: Git, Docker, Bun

Languages

English (Fluent), Hindi (Fluent), Finnish (Basic)
